EDITOR

The Standard editor was one many who attended a banquet the basement of the Methodist church at Campbell last Thursday evening in honor of Southeast Misscuri's member of the State Highway Commission, Hon. H. G. Simpson, and Southeast Missouri's Division engineer F. J. Noonan The members of the Dunklin County Court were present as well as other prominent citizen of that county. From Charleston were H. G. Simpson and Harle Estes, and from Sikeston were, I J. Noonan, R. C. Caplinger, Eddie Mathes and C. L. Blanton, Sr. Dr. Jones, of Campbell, was toastmaster, and a pretty keen one at that. After the table was cleared, the toastmaster called on C. L. Blanton for a few remarks, then Mr. Simpson gladdened the hearts of the many Campbellites present, by informing them the Highway Commission had decided to at once build Highway 53 from Holonce build Highway 53 from Hol-comb through Campbell to con-nect up with the hard road to back home in the important posi- under way. tion that had been assigned him, and promised his hearty co-operation in securing and building per- concrete roof. It will have space manent roads for this division.

Rogers Peet Fine Suits....

AND AN IDEA BORROWED FROM BIRDS

The soft colorings in the feathers of pheasants inspired our fabric designers when they conceived the group of suitings we call "Pheasant Shades". There are delicate browns and grays, some with subdued overplaids in the newest manner giving an appealing though conservative effect. These suits are made single or double breasted, have the individual touch of Rogers Peet, master-designer and are all hand-tailored in their own workrooms.

The controls of the 1936 Kelvinator keep food compartment temperatures ideal, regardless of how hot it is in the kitchen. And you can see what the temperature is, because a Built-In Thermometer tells you that food is being kept surely, safely, dependably cold.

Today, for the first time in the history of the industry, Kelvinator provides you with a Certificate of Low Cost of Operation. The 1936 Kelvinator uses one-half or onethird as much current as many refrigerators now in use. This saving alone may justify replacing your old refrigerator.

You may know today, beyond a shadow of doubt, that the refrigerator you buy will give you long years of service. Because the 1936 Kelvinator is backed by a 5-year Protection Plan, written and signed by the oldest company in the electric refrigerstion industry.

To WHERE you will throughout the country, there is one word that has assumed a new meaning-one word, today, expresses everything that is new-everything that is beautiful-everything that is modern in refrigeration-and that one word is . . . Kelvinator.

For the 1936 Kelvinator has changed the thinking of America about refrigerators. It has made millions of people dissatisfied with what they have and eager for what is now offered for the first time.

First of all, the 1936 Kelvinator gives you visible cold. Food preservation reaches a new degree of perfection. Temperatures in the food compartment are ideal-safely below 50 degrees-regardless of how hot it may be in the kitchen. And safe temperatures are made visible for the first time by a Built-In Thermometer.

Then, it gives you visible economy. Operating cost has been reduced to a balf and even a third of that of many refrigerators now in use. And you know your Kelvinator will use only a small amount of current because you receive a Certificate of Low Cost of Operation.

And then, it gives you visible protection. Responsibility for dependable service over a period of years is accepted by the manufacturer. For every Kelvinator is backed by a 5-year Protection Plan, signed by the oldest company in the electric refrigeration industry.

A new meaning is given to the word "convenience" with the introduction of the 1936 Kelvinator. Every ice tray has a flexible rubber grid, providing full-sized, colder, larger cubes, without melting them out of their moulds.

The 1936 Kelvinator has an automatic defrosting switchsliding shelves in the food compartment, interior light, food crisper, utility basket, room for tall bottles and odd-shaped dishes. It has everything that the experience of users has

Whether or not you own an automatic refrigerator today, see the 1936 Kelvinator. Compare it with the refrigerators you have used or have seen, and learn how easily it may be purchased by our liberal Deferred Payment Plan.

Who's Paying for Your Street Lights?

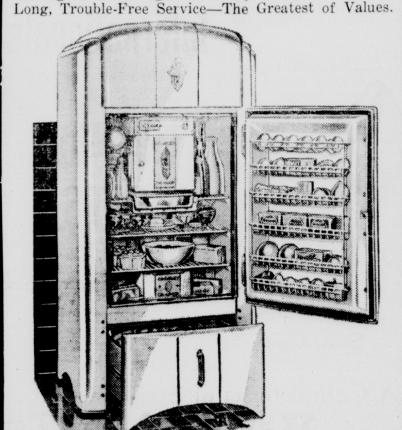

The White Way and other Street Lights of Sikeston have not been costing tax-payers anything for the past few years, because these lights were provided by the Municipal Light and Power Plant without pay for them being taken out of tax payments.

In other words, the people who patronize the Municipal Light and Power Plant provide the street and White Way Lights.

If you are not a patron of the Municipal Light and Power Plant, then you are not paying one cent to provide for the lighting of Sikeston streets.

Are you providing your own street lighting, or are you letting your neighbor provide it for you?

Rogers Peet Fine Suits

AND AN IDEA BORROWED FROM BIRDS

The soft colorings in the feathers of pheasants inspired our fabric designers when they conceived the group of suitings we call "Pheasant Shades". There are delicate browns and grays, some with subdued overplaids in the newest manner giving an appealing though conservative effect. These suits are made single or double breasted, have the individual touch of Rogers Peet, master-designer and are all hand-tailored in their own workrooms.

Visible

The controls of the 1936 Kelvinator keep food compartment temperatures ideal, regardless of how hot it is in the kitchen. And you can see what the temperature is, because a Built-In Thermometer tells you that food is being kept surely, safely, dependably cold.

Today, for the first time in the history of the industry, Kelvinator provides you with a Certificate of Low Cost of Operation. The 1936 Kelvinator uses one-half or onethird as much current as many refrigerators now in use. This saving alone may justify replacing your old refrigerator.

You may know today, beyond a shadow of doubt, that the refrigerator you buy will give you long years of service. Because the 1936 Kelvinator is backed by a 5-year Protection Plan, written and signed by the oldest company in the electric refrigers-

Go WHERE you will throughout the country, there is one word that has assumed a new meaning-one word, today, expresses everything that is new-everything that is beautiful-everything that is modern in refrigeration-and that one word is . . . Kelvinator.

For the 1936 Kelvinator has changed the thinking of America about refrigerators. It has made millions of people dissatisfied with what they have and eager for what is now offered for the first time.

First of all, the 1936 Kelvinator gives you visible cold. Food preservation reaches a new degree of perfection. Temperatures in the food compartment are ideal-safely below 50 degrees - regardless of how hot it may be in the kitchen. And safe temperatures are made visible for the first time by a Built-In Thermometer.

Then, it gives you visible economy. Operating cost has been reduced to a half and even a third of that of many refrigerators now in use. And you know your Kelvinator will use only a small amount of current because you receive a Certificate of Low Cost of Operation.

And then, it gives you visible protection. Responsibility for dependable service over a period of years is accepted by the manufacturer. For every Kelvinator is backed by a 5-year Protection Plan, signed by the oldest company in the electric refrigeration industry.

A new meaning is given to the word "convenience" with the introduction of the 1936 Kelvinator. Every ice tray has a flexible rubber grid, providing full-sized, colder, larger cubes, without melting them out of their moulds.

The 1936 Kelvinator has an automatic defrosting switchsliding shelves in the food compartment, interior light, food crisper, utility basket, room for tall bottles and odd-shaped dishes. It has everything that the experience of users has suggested.

Whether or not you own an automatic refrigerator today, see the 1936 Kelvinator. Compare it with the refrigerators you have used or have seen, and learn how easily it may be purchased by our liberal Deferred Payment Plan.

See the new Kelvinator

Who's Paying for Your Street Lights?

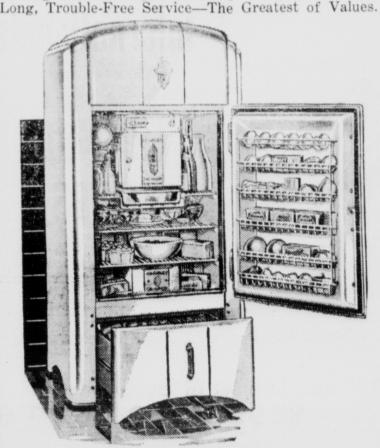

The White Way and other Street Lights of Sikeston have not been costing tax-payers anything for the past few years, because these lights were provided by the Municipal Light and Power Plant without pay for them being taken out of tax payments.

In other words, the people who patronize the Municipal Light and Power Plant provide the street and White Way Lights.

If you are not a patron of the Municipal Light and Power Plant, then you are not paying one cent to provide for the lighting of Sikeston streets.

Are you providing your own street lighting, or are you letting your neighbor provide it for you?
